PROFILE

Undergraduate Computer Science and Engineering student at United International University (UIU), Bangladesh, aiming for a career in research and technology. Interested in computer vision, natural language processing and multimodal machine learning, and in understanding systems from first principles before building with them. Currently strengthening foundations in Python, C, C++ and Java while working on machine learning, deep learning, digital image processing and cloud computing through hands-on projects.

EDUCATION

B.Sc. in Computer Science and Engineering
United International University (UIU), Bangladesh | Currently pursuing

Higher Secondary Certificate (HSC), Science
Principal Kazi Faruky School & College | 2022

Secondary School Certificate (SSC), Science
Principal Kazi Faruky School & College | 2020

PROJECTS

Student Marks Predictor [Live | GitHub]
Machine Learning | Python, Random Forest
Machine learning model that predicts student marks from various factors, giving insight to educators and students.

Heart Disease Detection [Live | GitHub]
Machine Learning | Python, Logistic Regression, KNN
Logistic regression classifier that estimates cardiac risk from patient data, with a simple web interface for entering values and viewing the prediction.

Grambondhon [Live | GitHub]
Web Development | HTML, CSS, JavaScript, TypeScript | Developer, 3 months
Web platform for communication and collaboration in rural communities. Developed the Admin and Farmer portals.

ProjectPulse [Live | GitHub]
Web Development | HTML, CSS, JavaScript
Team project tracker: Team Leaders break work into tasks, Members see what is due, and Teachers get a live view of team progress with feedback.

RESEARCH

Interests: Deep Learning, Large Language Models, Responsible AI, Multimodal Machine Learning
Paper: Ethical Implications of AI in Decision-Making

TECHNICAL SKILLS

Languages	Python, C, C++, Java, PHP, JavaScript, SQL, HTML, CSS
AI / ML	Machine Learning, Deep Learning, Digital Image Processing, Large Language Models, Agentic AI
Web & Databases	React, Tailwind CSS, Node.js, Express.js; MySQL, MongoDB, PostgreSQL
Tools	Git, Linux, Docker, Jupyter, Google Colab, VS Code, PyCharm, Figma, Jira
CS Foundations	Data Structures & Algorithms, Computational Theory, Operating Systems, Computer Networks, DBMS, Software Engineering
Exploring	NLP, Computer Vision, Multimodal ML, Reinforcement Learning, Generative AI, Cloud Computing, Rust, Go
