

Jahidul Islam Jony

CS Undergraduate | ML & AI Enthusiast

Focus: Machine Learning · Natural Language Processing · Computer Vision

jahiduljony60@gmail.com | github.com/theTerminatorrr | linkedin.com/in/terminator-t60

SUMMARY

Undergraduate Computer Science and Engineering student at United International University (UIU), Bangladesh, building a foundation across Machine Learning, Computer Vision, Natural Language Processing, Digital Image Processing, and Multimodal Systems. Interested in problems at the edge of perception and language, with a focus on understanding systems from first principles before building with them. Currently deepening core programming skills in Python, C, C++, and Java while exploring deep learning and cloud computing through hands-on projects, with a long-term goal of contributing to the field through research and innovation.

EDUCATION

B.Sc. in Computer Science and Engineering <i>United International University (UIU), Bangladesh</i>	<i>Currently pursuing</i>
Higher Secondary Certificate (HSC), Science <i>Principal Kazi Faruky School & College</i>	<i>Completed 2022</i>
Secondary School Certificate (SSC), Science <i>Principal Kazi Faruky School & College</i>	<i>Completed 2020</i>

SKILLS

Programming Languages	Python, Java, C++, C, HTML, CSS, JavaScript
Frontend	React, Tailwind CSS
Backend	Node.js
Tools	Git, Figma, VS Code, Jupyter, PyCharm
AI / ML Focus	Machine Learning, Natural Language Processing, Digital Image Processing, Computer Vision
Currently Exploring	Cloud Computing, Multimodal Machine Learning, Applied AI Engineering

PROJECTS

Heart Disease Detection github.com/theTerminatorrr/Heart-Disease-Detection-
An interactive logistic regression classifier that estimates cardiac risk from patient data, paired with a simple web interface for entering values and viewing the prediction.
Stack: Python, Logistic Regression, HTML, CSS, JavaScript

RESEARCH INTERESTS

Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Multimodal Machine Learning, Digital Image Processing, Artificial Intelligence
